RADIATOR & COOLING SYSTEM OIL REMOVER (AOC9000)

Product Description

RADIATOR & COOLING SYSTEM OIL REMOVER (AOC9000) is a unique, 100% active formula suitable for both Engine and Transmission oil contamination in the Radiator cooling system.

Product Benefits

- Easy to use in liquid form
- Effective cleaning of oil contamination and oil sludge
- Will not harm metal surfaces

Principle Uses

Purges automotive transmission fluid and engine oil contaminants from the cooling system.

Dosage

250ml treats 15 litres

Handling

Refer to the OIL REMOVER (AOC9000) Radiator & Cooling System Oil Remover Material Safety Data Sheet before using the product.

Instructions for Use

- Discard as much of the oily fluid in the cooling system as possible
- Remove the thermostat and reseal the thermostat housing
- Fill the radiator with water and add the oil remover
- Run the engine on high idle for 10 to 15 minutes
- Drain the radiator/cooling system and flush with water until clean
- Fit a new thermostat and gasket seal
- Refill the cooling system with the approved coolant
